

1 LIGHTER AND METHOD OF USE

2

3 ABSTRACT OF THE DISCLOSURE

4

5 An igniting lighter for a barbecue preparation apparatus is disclosed, in which a
6 safety device is naturally unlocked by the fingers of the igniting person during an
7 ignition of the barbecue preparation apparatus, and the safety device is automatically
8 locked after the ignition. In the igniting lighter of the present disclosure, the safety
9 button elastically supported by a spring is disposed at a rear of an igniting button, and
10 therefore, the safety button is pressed naturally by an indicating finger when pressing
11 the igniting button with a thumb, whereby the safety device is naturally unlocked
12 when igniting, and is automatically locked upon finishing the ignition.
